

Files to be submitted

1. student.txt file containing the output for the command
 - a. `db.students.find({}).limit(10)`
2. dept.txt file containing the output for the command
 - a. `db.departments.find({}).`

Instructions on how to submit the MongoDB assignment

1. Please install git.
2. Run the following commands in your command prompt or terminals:

`git clone https://github.com/archit-p/SummerProjects18`

3. A folder by the name of SummerProjects18 will get created.
4. Create a new folder inside SummerProjects18/Databases with your name as the name of the folder.
5. Inside your folder, copy the two txt files in a folder named "Assignment2".
6. Go back to command prompt or terminal. Navigate to the SummerProjects18 folder, and run:
`git add .`
`git commit -m "Assignment 2 submission for <your-name>"`
7. If there were no errors so far run:

`git push origin master`

8. If that shows any errors run:

`git pull origin master`

`git push origin master`
